Masamichi Tsuchiya JA2GXU

Dear Masamichi:

Thank you for allowing our Editorial Committee to review "Basic Theory and Concept for Reciprocal Mixing, Reciprocal Mixing Test and MRS." We consider each submission for all our publications and unfortunately are unable to accept your article for publication in *QST*, *QEX* or *NCJ*.

We evaluate submissions on a variety of criteria, including whether we have scheduled or recently published articles on a topic similar to yours.

Because of the sheer volume of incoming manuscripts, we cannot provide detailed critiques of every submission, or offer advice on how articles may be improved. We regret we are unable to carry on further correspondence regarding your submission.

I encourage you to submit your manuscript to other Amateur Radio publications. Even though an article may not be a good fit for our periodicals, it might be attractive to another publisher. Each magazine has its own editorial needs and requirements.

Of course, you are always welcome to submit new articles on other topics for *our* review. I look forward to seeing more manuscripts from you in the future.

73,

Kasimierz "Kai" Siwiak, KE4PT
Editor, *QEX*
